

INYATI RANGE

PROTECTION AND RESISTANCE

The Lemaitre Inyati range comes with an injected polyurethane/rubber sole with full leather uppers and is designed to keep feet safe and protected in hazardous working environments and offers high heat resistance. The rubber outsole offers resistance to water, oil and is cut and abrasion-resistant. Step out with confidence knowing your feet will be protected in all conditions. Give hard-working feet the protection they deserve in Lemaitre's range of durable safety footwear.

GLOSSARY

ABBREVIATION	MEANING
STC	Steel Toe Cap
SRC	Slip Resistance Rating
SMS	Steel Midsole
MTO	Made to Order

All Made To Order styles require a minimum 6 weeks lead time for production

Lemaitre Safety Footwear has been manufactured in South Africa for the last 30 years and celebrates the kinship of a hard day's work and the efforts put in by hard-working South Africans. Lemaitre understands that the workmanship that goes into their footwear affects the workmanship of the hard-working people that wear it. Manufactured to the highest possible standards with the best local materials. From fine stitching and quality leather to materials and components sourced in South Africa, Lemaitre has a strong focus on supporting South African businesses, especially local SMME's, throughout the value chain; creating more local talent and encouraging industry growth. This is also reflected in the homegrown talent of their expert shoemakers who combine traditional shoemaking across generations with cutting-edge technology to create Lemaitre Safety Footwear. Every pair is a commitment to your safety, from one worker to another.

RAPTOR RANGE

TORSION CONTROL SOLE UNIT: PU DUAL DENSITY | EXTRA WIDE TOE CAP 200J

The Lemaître Raptor range, with torsion control, provides the perfect fit for environments where uneven terrain is prevalent, such as construction and agriculture. Whether on the ground or traversing scaffolding or ladders, the built-in thermoplastic polyurethane (TPU) plate, available in the midsole of some of these safety shoes and boots, is designed around the pressure points exerted on the arch of the foot and assists in giving the foot added support and control. Keep hard-working feet safely secured in Lemaître's range of torsion controlled safety footwear.

APOLLO RANGE

SLIP RESISTANCE SOLE UNIT: PU DUAL DENSITY | WIDE STEEL TOE CAP 200J

The Lemaître Apollo range, with SRC slip resistance rating, offers maximum slip resistance, perfectly suited for environments where slip potential has been identified as high-risk. From petrol stations to kitchens and hospitals, this range is designed to provide maximum surface contact, ensuring maximum grip. The square cleat edges and flow lines in the cleat design of these safety shoes and boots can traverse any surface area, to maximise the slip resistance effect. Let hard-working feet stay firmly on the ground in Lemaître's range of slip-resistant safety footwear.

MAXECO RANGE

ALL-ROUND SAFETY SOLE UNIT: PU DUAL DENSITY | WIDE STEEL TOE CAP 200J

The Lemaître Maxeco range, with built-in arch support, is designed for all-round safety in the presence of general working hazards and is ideal for working environments with varying terrain such as agriculture. The soles offer a geometrically designed tread pattern to displace water and allow for the easy extraction of mud. Allow hard-working feet to step with ease in Lemaître's range of all-round safety footwear.

GLADIUS SOLE UNIT

PARABOLIC RANGE

COMFORT & ANTI-FATIGUE SUPPORT SOLE UNIT: PU DUAL DENSITY | EXTRA WIDE TOE CAP 200J

The Lemaître Parabolic range, with a thick polyurethane midsole, provides extra comfort for workers who spend long periods on their feet, in industries such as manufacturing. The parabolic curve in the sole adds "spring" by absorbing the wearer's mass. Discomfort is further eliminated by the deep cleats and air movement channels preventing heat dissipation through the sole. Treat hard-working feet to Lemaître's range of comfort-inspired safety footwear.
